

Hi there 

The past few weeks have felt special, like watching many pieces fall into place at once. It's been busy, yes, but also deeply rewarding. Behind every milestone is the same purpose that's guided us from the start: to build software that makes your work (and life) easier. We are humbled to see that vision resonate with so many.

It was especially meaningful to see our Union IT Minister [Ashwini Vaishnaw adopt Zoho's suite of applications](#) and [use Zoho Show to present at a cabinet meeting](#).

Meanwhile, our messaging app, [Arattai](#), also found a warm welcome by the ministry, including Union Commerce Minister [Piyush Goyal](#) and [several business leaders](#).

And in Tenkasi, we had the pleasure of hosting Union Education Minister Dharmendra Pradhan, sharing with him our [rural revival efforts](#) and a peek into the [innovations brewing](#) at [Karuvi Tech](#), our mechatronics startup.

Moments like these remind us why we do what we do. As our co-founder Kumar Vembu often says, [it's our values that keep us grounded](#) while we reach for bigger dreams; and your continued support gives our vision its wings.

There's more in store for you this month, so keep scrolling—we can't wait to share what's next!

Until next time,
Sudharshan and the Zoho team

Collect sensitive info without worry

 With [Zoho Vault](#)'s SecureForms, you can [safely gather confidential data](#) inside or outside your organization. The data goes directly into your Vault, keeping everything encrypted, organized, and secure.

When creativity meets intelligence

 A blank page doesn't have to feel daunting anymore. With [Zoho Writer](#)'s AI-powered assistant, Zia, you can instantly [design templates or craft complete business documents](#) in moments with easy-to-use prompts.

 And, when your calendar starts filling up, [Zoho Bookings](#) helps you stay in control. [Cap the number of appointments you take each day](#), or the number a customer can book so your schedule stays balanced, even on the busiest days.

A sharper way to see your documents

If your old doc scanner is on the way out, it's time for something smarter. [Zoho Scanner](#) turns your documents into editable, shareable, and translatable files in moments. With AI-powered scanning that enhances clarity and automates document organization, it makes going paperless simple and seamless.

Conversations that move work forward

 Customer chats can be unpredictable, but [Zoho SalesIQ](#) helps you stay one step ahead. [Build intelligent workflows](#) to auto-assign or escalate chats, track missed ones, and keep every exchange on point.

 Meanwhile, [Bigin](#)'s upgraded WhatsApp integration makes staying connected effortless. With [interactive templates and automation](#) that ensure every message lands at the right time.

A little more in sync

With Apple rolling out iOS 16, iPadOS 16, macOS Tahoe, and watchOS 16, your devices just got a lot more smarter, and so did our apps. From on-device intelligence to thoughtful design refinements, [every detail has been shaped](#) to keep your experience smooth, connected, and in tune with your Apple ecosystem.

And, that's a wrap for now! Go ahead and give these updates a spin, we'd love to know what you think. Just drop us a note, we're always listening.

Love using Zoho?

[Refer us](#) and get rewarded.
